DATE, December 11, 1980

SUBJECT Emergency Action Plans Potential Site SelectionFROM *for* Paul M. Walker, Acting Director, SVAN
Regional Superfund Coordinator *Jim Foil*

TO Senior Staff

As discussed in yesterday's Hazardous Waste Task Force meeting, attached is a table to be completed and returned to Jim Foil (Room 1311) by noon tomorrow (December 12, 1980)

SVAN, ENFC, and ARHM are asked to complete those sections for which they feel most qualified to do so. Other divisions may respond if they wish.

The table is divided into three basic areas: knowledge of site, technical criteria, and other non-technical criteria.

The technical criteria are paraphrased from a report on site evaluation prepared by JRB Consultants under contract to Headquarters. All the criteria (but one) are to be numerically valued as indicated on the table.

The criteria is general, should you need some interpretation, contact me at X4284 or Jim Foil at X6840. Do not "weight" your numerical valuations as applied to each project and criteria.

This table absolutely must be returned by noon Friday December 12, 1980. Project ranking must be completed Friday afternoon to allow time to prepare for Bob Cibulskis' visit on Tuesday December 16, 1980.

Thank you for your assistance.
